Web & Internet

Simplex offers a complete portfolio of services for the web/online presence of any organization. Among others it offers web design, web development services, e-Commerce solutions and online payments, digital SSL certificates, shared hosting, virtual servers, domain names and DNS services and more.

Domain Services

Simplex offers a complete portfolio of Domain Name services, including public and private domain name registrations and DNS services. >

Hosting

Simplex offers a range of different hosting plans, capable of covering any possible need: from a personal or small business website to e-commerce and enterprise class websites. >

Online Payments

The Online Payments service from Simplex allows businesses venturing online to accept credit card or other types of payment such as PayPal and CashU. >

SSL Digital Certificates

Secure Socket Layer (SSL) certificates are used in e-commerce, e-banking, mail servers, etc. to secure the transmission of confidential information between servers and clients and in addition provide authentication of the server to the client. >

Web Development & Solutions

At Simplex we offer custom web development but also, pre-packaged solutions which are easy to adapt to fit your special requirements. >

Web Marketing

Simplex's Web Marketing services, including Search Engine Optimization (SEO) and Submission and management of PPC (Pay-per-Click) or CPC (Cost-per-Click) campaigns, guarantee targeted public awareness for your website and thus, your success. >

Key Features and Benefits

Help organizations with today's IT challenges:

- Cost for IT infrastructure
- Reliability and availability of network, bandwidth, hardware and power
- Security
- In-house human expertise
